

GEORGIA DEPARTMENT OF
COMMUNITY HEALTH

October 06, 2003

Dear Medicaid and PeachCare for Kids Providers,

In this payment cycle (October 6, 2003), the Department of Community Health continued to make prospective payments to payees who have providers billing in the below noted categories of service:

200 Home Health Services
320 Durable Medical Equipment Services
680 Mental Retardation Waiver Program
681 Community Habilitation and Support Services Waiver Program

The prospective payments were offset by the paid claim amount processed in this payment cycle. For all other providers, in this payment cycle, your payment amount is based on actual paid claims in the system.

For most providers in COS other than those listed above, DCH will apply 10 percent (10%) of your paid claims total from this cycle to previously paid prospective payments. The amount will be applied to any account receivable that has been established as a result of the department making prospective payments during the transition to ACS/GHP. These adjustments will appear on your RA as a Financial Transaction.

Thank you for your continued participation and support of the Georgia Medicaid and PeachCare for Kids Programs.
